

Eugenics and Other Evils

During the first three decades of the twentieth century, eugenics, the scientific control of human breeding, was a popular cause within enlightened and progressive segments of the English-speaking world. The New York Times eagerly supported it, gushing about the wonderful new science. Prominent scientists, such as the plant biologist Luther Burbank, were among its most enthusiastic supporters. And the Carnegie and Rockefeller foundations generously funded eugenic research intended to distinguish the fit from the unfit.
