

Agricultural Microbiology (Zhan Zhongling) (Chinese Edition)

This textbook simply and systematically introduces the basic concept and knowledge of agricultural microbiology, the contents include the morphological structure of microbiology, nutrition and medium, metabolism and fermentation, growing and environment, and the application of ecology with microbiology on agriculture, etc. Each chapter is set with learning goals, skill goals, chapter summary, review and reflecting, and experience with practice; the annex is also attached behind the book to facilitate readers inquiry. The textbook extensively uses figures and tables to make it easier to understand and to add its readability, focusing on the principle of necessity, sufficiency, and practicality.
